At this time of the year we often take an inventory of the past 12 months. From the piping and teaching perspective it has been a most enjoyable year... lots of enthusiasm and we all, as students, have been making progress. However, the piping fraternity has been saddened with the passing of several players; we stop to reflect on their contribution to the music, always remembering the happy and good times.

From our house to your house, the Admiral and myself wish you good health, prosperity and success in 2012.
